Temperatur in Karlsruhe

Klimadoppel

2080 - so heiß wird es in Ihrer Stadt

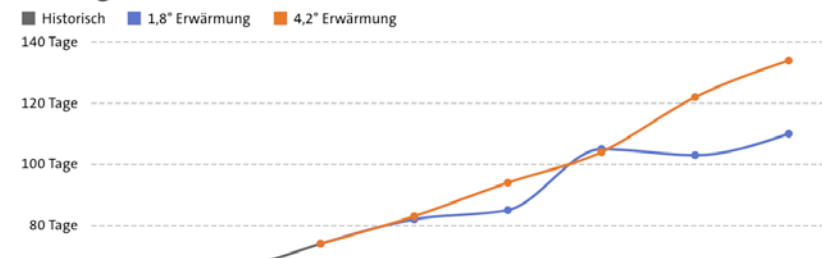

Stand: 02.12.2018 11:00 Uhr

Erhitzt sich die Erde um 4,2 Grad, wird es in Magdeburg im wärmsten Monat 2080 so heiß wie heute in Mexiko-Stadt. Dort wird es dann so heiß wie jetzt in Thessaloniki. Testen Sie im Klimadoppel, wie sich die Temperaturen an Ihrem Ort bis 2080 entwickeln.

Die weltweite Erwärmung auf maximal zwei Grad zu begrenzen - darauf hatten sich die Staaten schon bei der Klimakonferenz 2015 in Paris festgelegt. Jetzt beraten Vertreter aus mehr als 190 Staaten bei der UN-Klimakonferenz im polnischen Kattowitz, wie das genau geschehen soll.
